ANTI AGING WRINKLE INJECTION TREATMENT

Repeated facial movement over time forms deep lines and folds known as static wrinkles. Anti-wrinkle injections prevent the formation of static wrinkles by blocking the chemical signal the brain sends to the muscle, telling the muscle to contract. Decreased muscle movement places less stress on the overlying skin, instantly softening lines and wrinkles, giving you a tighter, more youthful appearance.

Anti-Wrinkle injections can be used to treat a variety of areas but most commonly crow's feet (lines around the outer eyes), glabella (between the eyes) and the forehead.

PLATELET RICH PLASMA THERAPY

Platelet Rich Plasma (PRP) Therapy is a collagen stimulating therapy, ideal for treating ageing skin, improving texture, tone, fine lines and wrinkles, it is also used in the treatment of hair loss. Commonly referred to as the 'Vampire Facial' and used by celebrities such as Angelina Jolie and Kim Kardashian, it is a simple procedure that involves taking a normal blood sample within the practice and concentrating it down to the platelet rich plasma. This is then infiltrated into the desired areas such as the face or scalp.

MEDICAL RHINOPLASTY TREATMENT

Non-surgical rhinoplasty is also known as the 15 Minute Nose Job, it is used for both cosmetic and health purposes since it can aid people who might have trouble breathing. Non-surgical rhinoplasty uses dermal fillers to improve the appearance of your nose by softening bumps and lumps, raising the nasal bridge and filling the nasal tip. The dermal fillers make discreet but noticeable changes to the nose that can last for a year or more.

LASER TREATMENTS

At Skintastic Beauty, we offer Clear + Brilliant laser technology as a comfortable, quick, and safe way to reduce the appearance of acne scarring and pigmentation, and for skin tightening.

SKIN TIGHTENING

The Clear + Brilliant laser helps with the regeneration of damaged skin cells while stimulating dermal collagen production.

PIGMENTATION

Melanin in the skin is attracted by the laser which then absorbs then the light and is drawn to the surface. Once brought to the surface, any pigmentation in the treatment area will dry and fall off.

ACNE SCARRING

For shallow to moderately shallow acne scarring and discoloration, Clear + Brilliant uses non-invasive laser technology to gently resurface the top layer of the dermis by creating millions of microscopic treatment zones in the skin. After just one treatment, you will notice a significant improvement in the appearance of acne scars.

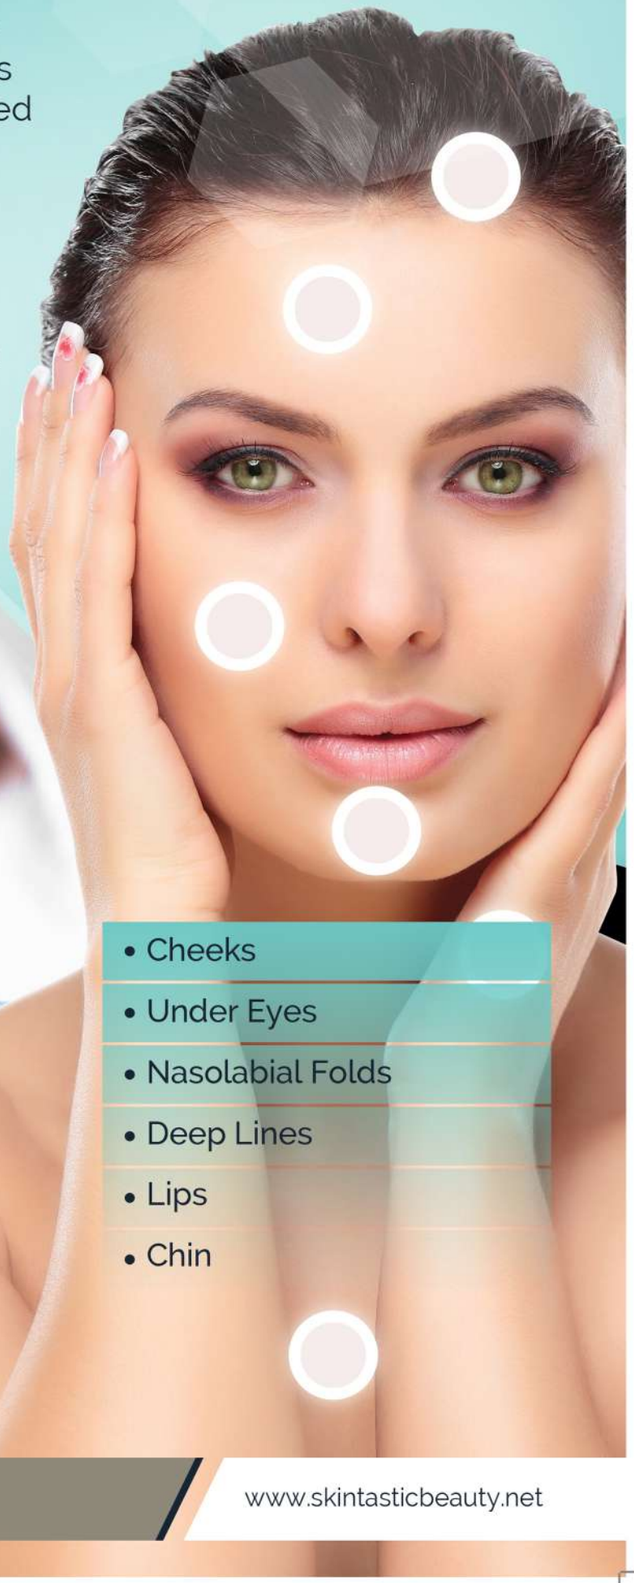
DERMAL FILLERS TREATMENT

With age, certain areas of the face start to lose volume which make us look tired and sunken. This is caused by the body's decreased ability to produce collagen and elastin.

Dermal fillers are specifically formulated to assist in the revolumisation of facial contours in a variety of areas including:



- Cheeks
- Under Eyes
- Nasolabial Folds
- Deep Lines
- Lips
- Chin

VENOUS SCLEROTHERAPY TREATMENT

Sclerotherapy treatment is relatively painless and works by injecting a small amount of sclerosing agent into a vascular vein, this will create a minor inflammatory reaction inside the vein, causing it to collapse. The number of treatments required will depend on the size of the vein and your skin's reaction. Smaller veins will respond more quickly to treatment, only taking between five and 30 minutes. Most spider veins can be permanently reduced, but one or two touch-ups may be required to keep the results looking fresh. This non-surgical method of reducing the appearance of veins will allow you to walk out of our clinic with regained confidence.
